

## About Seagull Electronics

The roots of Seagull Electronics date back to the founding of Seagull Hardware by Jacob Siegel in 1956. In those days, televisions and other electronics goods were sold in hardware stores. His son, Steven, took over the electronics part of his father's business and formed Seagull Electronics in 1988.

Because of its reputation for excellence, Seagull Electronics has grown and now installs electronics systems in homes throughout south Florida. Many customers are so impressed by the work Seagull Electronics has done on their winter homes, they've flown our staff to their permanent residences to install systems.

# We're a family business that treats our clients like part of the family.

Audio Systems ■ Home Theaters ■ Home Automation ■ Lighting Control Systems

## Working Together

We work closely with architects, interior designers, builders and homeowners to ensure that your electronic systems are perfectly integrated with the rest of your home.

## Simplify Your Life

We sell high-end audio and video systems, but that doesn't mean they're difficult to use. Part of our job is to set up your system so that you can have perfect sound and perfect video at the touch of a button.

We're here to make it easy for you. We want to make certain you can use your system comfortably. In fact, if you have a problem, you can just give us a call. We'll even make return visits at no cost once your system is installed.

# Seeing ... And Hearing ... Is Believing

*We believe Seagull Electronics ranks with the best in the industry, but don't take our word for it. Review our proposal.*

*Compare our systems with anyone else's.*

*Check our references. We're confident that you'll agree with our assessment, because seeing ... and hearing ... is believing.*

## High-End Experience

Seagull Electronics has been Palm Beach County's premier custom electronics authority since 1988. Our team of designers and installers has been working together for years. They stay together, because we provide an opportunity to install some of the most advanced systems in the country.

Our team can meet your complete home electronics needs, but is especially adept at:

- Distributed Audio Systems
- Home Theaters
- Home Automation
- Lighting Control Systems

Perfect sound is just a touch away.

## Surround Yourself With Music

**You enjoy music**, so why should your listening experience be confined to one room of your home? With a distributed audio system, you can bring your music to any room in your home and even poolside, to your deck or patio.

A distributed audio system puts you in control of your entire music collection from anywhere. You can call up thousands of CDs on a TV or computer screen, and select the songs you want with a touch of a button. You can even have Beethoven playing in the bedroom and Billy Joel in the family room.

A distributed audio system can put you in control of what you hear and where you hear it. You can even adjust the volume from another room. Perfect sound is just a touch away.

DISTRIBUTED AUDIO SYSTEMS

## Good Enough To Sell Tickets To

To build a home theater that’s so good you could sell tickets, you’ll need three things:

**Perfect sound.**

Best selling doesn’t mean best sounding. We work with top names you won’t find at audio chain stores. Sound quality depends not only on the equipment, but on its placement in your room, the way your room is configured and even your furnishings. Our audio experts will consider all of these factors, and design the perfect system for your environment and budget.

**An eye-catching picture.**

Our image depends on the image we provide you. The latest high-definition, plasma-screen televisions are revolutionizing the way we view television, and new advances are taking place almost every day. We keep abreast of the latest technology, but research and test it thoroughly before recommending it.

**Ambience.**

Seagull Electronics pays attention to every detail, including aesthetics, comfort and even ergonomics. We’ll install custom cabinetry, automated draperies, theater seating, theme art, lighting controls ... even a popcorn maker if you want it.

## Smarter Homes

We all spend a lot of time searching for just the right temperature. That’s why so many of our clients buy second homes in Florida. Home automation can ensure that your home is always at the right temperature. You can even control the climate in your Florida home while you’re up north for the summer.

And there’s a lot more to home automation than just climate control. Today’s homes can be programmed to meet all of your needs – you can control the lighting and music in your home, and even the water temperature in your swimming pool and spa. You can set up cameras to monitor your children or keep an eye on your property. You can call from your cell phone and have everything in your home set just the way you want it when you walk in the door.

HOME AUTOMATION

Smart homes are getting smarter. If you have an idea If there’s an electronic solution, Seagull Electronics

for raising the IQ of your home, call us and discuss it. can provide it.

# HOME THEATRES

*Our goal is to make your home entertainment center as realistic as possible.*

*We will put you on stage for the Academy Awards, on the green for the U.S. Open or wherever in the world you want to be – without ever leaving your home.*

LIGHTING CONTROL SYSTEMS

## Let There Be Light

Lighting controls provide safety, security, convenience and just the right ambience.

**Safety.**

Want to be able to walk around your home safely, even at night? A special “midnight light” setting will provide enough light for you to negotiate your hallways without hurting your eyes.

**Security.**

You used to have to set timers throughout your house to turn lights on and off while you were away. Now, with the push of a button, you can set each of your lights to go on and off at predetermined times, creating the appearance that someone is home.

**Convenience.**

Lighting controls can simplify your life. With the push of a button or a call from your cell phone as you approach your home, you can turn on your exterior lights just as your garage door opens. You can set all of the lights in your home to go on or off from a single panel or even a single switch.

**Aesthetics.**

Lighting can have a big impact on a person’s mood. There are times when bright lights are best and times when dim lights are more appropriate. You can pre-set your lights to provide just the ambience you’re looking for. We can also replace those ugly wall switches with simpler, more aesthetically pleasing lighting controls.

# Electrify Your Life

The right electronics can electrify your life.

Whether you want to automate your lighting or your climate controls, install an audio system that plays your favorite music throughout your home or build a first-class home entertainment system, our first step is to meet with you at your home.

Where you locate your system and how you install it is as important as the system itself. We'll design a system that makes the best use of your home environment. We may also make recommendations for changes that can enhance your enjoyment of your electronic systems.

The other reason we visit your home is that we want to get to know you. The better we know you, the better we can serve you.

## We Make House Calls

**Imagine** being able to access any song in your music collection and adjust the volume from any room in your home. Or imagine a home theater with such sound and picture quality that you feel as though you are on the playing field with your favorite athletes. Imagine being able to check on your home from your laptop computer while you travel the world. Or being able to watch your kids in the pool from a monitor in your kitchen.

Seagull Electronics sells the right electronics. **We don't sell the stuff you'll find in boxes at your local shopping mall.** We design custom systems using some of the world's best electronic components.
